Conical container with reinforcement drums and handle. Endless combinations in order to hold a multitude of products, from olives to solvents and abrasive products.

CONTAINER DETAILS

Possible closures: lug nut, leaf spring ring with flat lid (special closure, much more solid and secure).

MAIN CHARACTERISTICS – Common to all formats:

- The containers can be supplied lithographed externally and/or varnished internally.

Takes up less space in your warehouse thanks to a stacking system, requiring less storage space.

Possibility of incorporating extendible or screw cap (57 mm diameter) plastic cap into the lid.

- Equipped with flip-up handle with grip (depending on model).
- Approved for the transportation of dangerous goods in accordance with UN regulations.

MAIN CHARACTERISTICS – Leaf spring ring:

- Leaf spring ring, security guarantee in transport and storage.
- Enables the approval of ADR liquid products.
